The smallest portable 35mm cinema projector

LH400 is the smallest portable 35mm cinema projector, designed and built to meet the specific needs of small cinemas and for those who carry out private screenings, advertising services, presentations, etc. with excellent professional results. Strong and lightweight, LH400 is easily transportable; its attractive design contains, despite its small size, the experience of large stationary installations, advanced technology and all standard components of film projectors. The detachable arms are connected without external wires and reels may bring up to 1800m.
